

ABM Transaction Editor

Ever discovered a data entry error and wished you could change it without the hassle of reversing, crediting and re-entering?

Ever had operational changes that alter planned delivery dates and cause endless data re-entry?

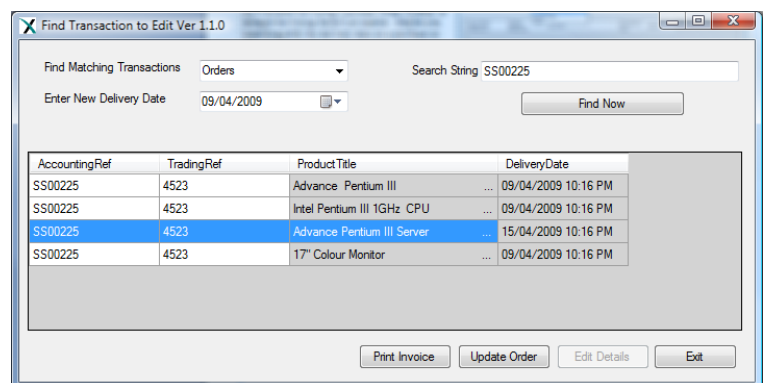

Waste time no longer with the ABM Transaction Editor by Axsapt!

The ABM Transaction Editor (ATE) allows you to change non-financial and otherwise non-critical fields within ABM easily and without fuss.

ATE is a simple yet powerful utility. Purpose built by Axsapt to Integrate seamlessly with your ABM software.

With a few simple clicks, you can change a range of fields including: Duedate, CustomerOrderNumber, Description, DepositNumber, Payee Name, SerialNumber, UseByDates and **MORE!**

Use ATE from within the familiar surroundings of ABM to perform time saving changes after it would normally be too late to edit.
